LAMP joins Sedex in commitment to social and environmental sustainability

Sedex | Member

VERDERIO 3 OCTOBER 2024

LAMP has become a Sedex member, joining the world-leading organisation in their latest commitment to supply chain sustainability.

LAMP is dedicated to being a responsible business, managing their operations and supply chain in a way that safeguards workers, communities and the environment. Joining Sedex supports LAMP's established ethical sourcing, CSR, sustainability programme. This includes *This includes obtaining the* ***SMETA 4 PILLAR***

Sedex's technology and services help companies such as LAMP to source more sustainably. The platform and solutions provided empower businesses with the practical tools, data analysis and insights needed to drive more socially and environmentally responsible practices in their both own operations and with suppliers.

LAMP will use Sedex technology and data tools to *add in relevant activities and targets e.g. integrate risk assessment, audit and worksite data to better understand working conditions and drive positive impacts / capture, analyse and report on key ESG areas and indicators*

Lamp is strongly committed on supporting the transition towards the circular economy and the bioeconomy.

"Sedex is delighted to welcome LAMP as a member. We welcome their commitment to sustainable business, and look forward to supporting them to achieve their social and environmental sustainability goals."

Jon Hancock, CEO, Sedex

Notes to editors

LAMP

Lamp is strongly committed on supporting the transition towards the circular economy and the bioeconomy. To achieve this, three guidelines are targeted:

- *The improvement of the environmental efficiency of its production site, obtained through investments in technologically advanced lines, aimed at reducing the consumption of environmental energy resources (following the corporate ESG guidelines);*
- *The reduction of scraps, the minimization of waste and the maximization of by-products, targeting the maximum reuse of internal resources within the production sites;*
- *The creation of new products meeting legislative requirements, aimed to the environmental footprint reduction. It is in this vision that the development of eco-sustainable products is declined, activity which in recent years in LAMP has had an exponential propulsive development*

About Sedex

Sedex is a global technology company that specialises in data, insights and professional services to empower supply chain sustainability. Our platform, tools and services enable businesses to easily manage and improve their environmental, social and governance (ESG) performance to meet their supply chain sustainability goals.

Sedex has nearly 20 years of expertise and provides end-to-end supply chain solutions for all businesses, including SMETA, our world-leading site-level social audit. We're proud to work with a community of 75,000 businesses and 100,000 supply chain sites across 35 sectors globally. This includes some of the world's most recognisable brands such as Reckitt, Nestlé, Molson Coors, Yum! Brands, Marks & Spencer, Mengniu, Asahi, Li & Fung, John Lewis Partnership (JLP) and Barclays to name a few. Visit our website for more information
